

CLAIMS

What is claimed is:

1. A method for creating a presentation, comprising the steps of:
 - (a) receiving information indicative of a goal;
 - (b) integrating information that motivates accomplishment of the goal for use in the presentation;
 - (c) evaluating progress toward the goal and providing feedback that further motivates accomplishment of the goal; and
 - (d) managing the presentation of information around specific requirements designed to achieve the goal.
2. A method for creating a presentation as recited in claim 1, wherein the requirements include direct linkages to remedial education presentations.
3. A method for creating a presentation as recited in claim 1, wherein the requirements include limits that prohibit access to sections of a presentation until the goal is obtained.
4. A method for creating a presentation as recited in claim 1, including the step of limiting access to sections of a presentation until appropriate prerequisites are completed.
5. A method for creating a presentation as recited in claim 1, including the step of providing feedback that identifies a navigation path for a student based on the goal.
6. A method for creating a presentation as recited in claim 1, including the step of utilizing a student identifier to control access to appropriate presentation material.
7. A method for creating a presentation as recited in claim 1, wherein each item in the presentation is assigned an identifier to provide a level of granularity for restrictive access to presentation material.
8. A method for creating a presentation as recited in claim 1, wherein each activity associated with a presentation is identified to provide a level of granularity for restrictive access to the activity.
9. A method for creating a presentation as recited in claim 1, including the step of storing a current location for one or more students that tracks the one or more students progress in the presentation.

- 1 10. An apparatus that creates a presentation, comprising;
2 (b) a processor;
3 (c) a memory that stores information under the control of the processor;
4 (d) logic that integrates information that motivates accomplishment of the goal for use in the presentation;
5 (e) logic that evaluates progress toward the goal and providing feedback that further motivates accomplishment of the
6 goal; and
7 (a) logic that manages the presentation of information around specific requirements designed to achieve the goal.
- 1 11. An apparatus that creates a presentation as recited in claim 10, wherein the requirements include direct linkages
2 to remedial education presentations.
3
- 1 12. An apparatus that creates a presentation as recited in claim 10, wherein the requirements include limits that
2 prohibit access to sections of a presentation until the goal is obtained.
- 1 13. An apparatus that creates a presentation as recited in claim 10, including logic that limits access to sections of a
2 presentation until appropriate prerequisites are completed.
- 1 14. An apparatus that creates a presentation as recited in claim 10, including logic that provides feedback that
2 identifies a navigation path for a student based on the goal.
- 1 15. An apparatus that creates a presentation as recited in claim 10, including logic that utilizes a student identifier to
2 control access to appropriate presentation material.
- 1 16. An apparatus that creates a presentation as recited in claim 10, wherein each item in the presentation is assigned
2 an identifier to provide a level of granularity for restrictive access to presentation material.
- 1 17. An apparatus that creates a presentation as recited in claim 10, wherein each activity associated with a
2 presentation is identified to provide a level of granularity for restrictive access to the activity.
- 1 18. An apparatus that creates a presentation as recited in claim 10, including logic that stores a current location for
2 one or more students that tracks the one or more students progress in the presentation.
